

Buy American Covenant

We understand that it is in our vested self-interest to choose American products and services. We realize that global outsourcing has sent millions of American jobs overseas and is threatening our way of life. In addition to harming American workers this practice builds up the economies and militaries of foreign nations capable of becoming ostensible adversaries.

In order to do our part to effect change, we hereby declare that from this day forth we will make a diligent effort to buy American products. If no such product is available we will forgo its purchase and will apply reasonable effort to find an alternative unless such pursuit would cause undue hardship, such as financial or physical distress. We, the undersigned, agree to hold one another accountable to the terms of this agreement.
